Wood collecting simulator.

Not even joking here. That is the aim of the game. Run around collecting enough wood, to fill a box and keep your campfire going. If you fail to do either, or you freeze to death from being out collecting wood for too long then it is game over.

Once you figure out the balance needed to keep the fire going (hint add small amounts) and if you have filled the box by nightfall then you win. And then you get to do it over and over again. On a small map.

Basically boring and repetitive busy work, with at least some pretty decent graphics and an okay sound track.. No more Updates GG game.. Great little board game on the PC. At first glance, it seems quite unforgiving and cruel - but then as you fail a couple times, you learn how to mitigate your failures, through food use and tools and early strategy. I only wish it was somehow bigger or had other scenarios.

If you're a fan of games like Tharsis or Elder Signs, you'll probably like this one, or maybe find it too easy. Otherwise a stylish introduction to the world of the dice-survival games. 10/10 worth it for the boss fight at the end where you throw henchmen off a building at the final boss... hilarious.. This game is fun whereas most other VR games so far may be interesting, but not actually very fun... at least in my experience.

I played through all 3 levels on normal right away. I will prob wait for updates before playing more but this was FUN!. The controls are choppy, everytime you make a turn with the loader all of the boulders fall out. The missions are boating and repetitive. Just all around a terrible game. Bought it with a 90% discount so I paid 0.10€. If I'm lucky I will recover some of my money with my trading cards. Ok, Cons and Pros:

Cons:

- 1.6 GB of RAM just from the start.
- Crashes everytime.
- Bad controls.
- No menu to know the keys you have to use (or rebinding).

Pros:

- Trading Cards.
- Brings me back to those 2001 ♥♥♥♥♥♥ flash games but without annoying ads.
- Gives you a reason to write a review.
- Forces you to think a 4th reason.

So 4 pros, 4 cons, that's quite a balanced game right there!. It's a very beautiful visual novel, with characters fully animated. It explains a lot about japan, but the story lacks originality.. This game is awful garbage. Refund.. As a person with an immense fear of birds, being allowed to punch them to death as one of the first options in this game makes it an automatic 10/10 for me.

But don't punch them if you want to get a good ending

I'd say that this is one of the greatest games of our time, with innovative gameplay elements and a story of an AAA game and a large open world. Combat is awesome as well as the stealth aspects of the game. It's a mix of Grand Theft Auto, Metal Gear Solid and the original Fish Fillets, which is also a classic. This masterpiece goes on my top one list of PC games, that's for sure.. Best trade deal in the history of trade deals.. The game is cute and fun, however, there is little to no player online (in Australia anyway). This is crucial since the game advertised itself as an multiplayer game with a lot of interaction with other players and friendship etc.

The game itself is ok-ish, it has everything you would expected in an mmo game (quests and grinding etc.). It can be fun and interesting sometime. The art design is cute and anime style.

6/10, if there is more players then 7.5/10. I have not made it all the way through the game yet. How in gods name is this game \$5.00.....I have played free to play games that are 10 times better. Is there something more harsh then just a simple No(Do Not recommend) that I can click.

\$5.00????!!!.....That's a crime!.....Literally!. horrible controls, bad level editor, i would only reccomend it to troll someone. Amazing Concept. graphics are really nice. music and everything,

a hell of allot of fun to play. 8V10. THIS GAME IS AWESOME!!! only one thing holding it from greatness ->*player count* If i had to sum it up its a Super hero\super power multiplayer playground battle arena.... A nice story and a big history lesson in Japanese traditions and culture.. All I have to say is Horrible even if you can get it cheap it's not worth 1 cent.. Computer teams cheat by making captures that are supposed to be impossible, like taking a spearman with a spearman. At least on expert and above difficulty. Haven't seen it happen on begineer.
